Nebraska Liquor Control Commission Selects POSSE ABC Solution for Centralized Alcohol Management Project (CAMP)

DENVER, Colorado – **Computronix** is pleased to announce that the **Nebraska Liquor Control Commission (NLCC)** has selected, through a competitive procurement process, the **POSSE ABC (Alcoholic Beverage Control)** system as the preferred solution for the State of Nebraska’s Centralized Alcohol Management Project (**CAMP**).

NLCC serves a growing population of 1.9M+ citizens and is responsible for the administration of more than 11,000 active retail licenses. POSSE ABC will replace the State’s outdated system requiring 69 discreet process steps to issue a license, in favor of a fully integrated web-based alcoholic beverage control system for licensing, permitting, compliance, enforcement, education, training, brand registration, and more.

Powered by **POSSE**, an award-winning workflow automation platform, POSSE ABC will equip NLCC to streamline and support critical business processes including business rules automation, information management, business intelligence, citizen self-services, GIS integration, and mobile capabilities.

“The Nebraska Liquor Control Commission is pleased to confirm our selection of the POSSE ABC system from Computronix as the preferred solution for our Centralized Alcohol Management Project (CAMP). A proven alcoholic beverage control solution with deep feature off-the-shelf capabilities, POSSE ABC will enable us to rapidly modernize our licensing and reporting services (both internally and externally) within the framework of a centralized services initiative designed to improve our customer services, increase our operational efficiencies and revenues, and strengthen our industry engagement and education.”

LeAnna Prange, Deputy Director, Nebraska Liquor Control Commission

“Computronix is grateful for the opportunity to provide Nebraskans with exceptional taxpayer value with the implementation of our market-leading POSSE ABC solution. POSSE ABC’s proven track record of innovation success across a diverse range of liquor, cannabis, and gaming control agencies demonstrates this solution’s capabilities for streamlining and automating the full gamut of liquor control processes. We

look forward to working with the team at the Nebraska Liquor Control Commission to achieve their vision for a modern and robust centralized alcohol management system, with POSSE ABC as their proven platform for innovation.”

Gordon Meeberg, Vice-President of Business Development, Computronix

[POSSE ABC customers](#) include the State of Oregon Liquor & Cannabis Commission (OLCC), State of Missouri Division of Alcohol and Tobacco Control (ATC), State of Louisiana Office of Alcohol and Tobacco Control (ATC), Arizona Department of Liquor Licensing and Control (DLLC), Pennsylvania Liquor Control Board, State of Kansas Alcoholic Beverage Control Division, State of New Jersey Division of Alcoholic Beverage Control, the Alcohol and Gaming Commission of Ontario, and the Newfoundland-Labrador Liquor Corporation.

Computronix is a leading provider of transformative software solutions for land management, alcohol beverage control, enterprise licensing and workflow management. Winner of 19 International Awards including the Smithsonian Institute’s collection of ground-breaking software, our POSSE Platform is a wholly integrated and fully realized product suite. A true service-centric organization, exemplified in our 100% Project Success rate and industry leading employee retention rate, Computronix is proud to serve major government clients representing over 100 million citizens from Honolulu to Halifax.
